

Category: Jewelry

NCA Standards:

1. Items should be designed in relation to the human body and should move with it.
2. A piece must be strong enough that it does not bend or break easily.
3. Any stones used must be of good quality.
4. Settings must hold stones securely.
5. There must be no sharp edges to catch clothing or skin.
6. Hardware must be securely attached and in good working order.
7. Excess solder must be removed, edges must be clean, smooth and ready to wear.
8. Indicate on any of your products if they contain nickel.
